

SYSTEMS FOR CALLING HELP

Safeguarding the safety and protection of people

We offer technology for monitoring people, which increases their safety and detects emergency states. In life-threatening situations or other restrictive situations, monitored person can contact a control room and call for help. We supply hardware and software that enables the monitoring of people in various institutions.

AREAS OF USAGE

Hospital

School

Shopping centre

Employment department

LOCAL EMERGENCY UNITS

They are designed for any type of institute where there is a possibility that employees could be assaulted (hospitals, schools, shopping centres, petrol stations, government offices, casinos, etc.) or for care institutions (old peoples' homes, care homes, etc.).
