Installation Guidelines

For easier installation, programming and RF testing should be done to check for good communication between the control panel and all system devices before mounting system devices. Install the detector and other system devices in the following order:

> Programming/RF Testing - program detector and all other devices into the control panel and test RF communication from each intended device location to the control panel.

> Mounting - Mount detector at the tested location.

Mounting Rules

> Use proper tools and hardware.

> Mount indoors in a temperature controlled environment.

> Mount detector on frame and magnet assembly on movable opening (door, window).

> Do not exceed 20 mm (6/8") gap between detector and magnet.

> Magnet spacer must be used to match magnet height with detector to ensure correct alignment and functionality.

> Do not install product on ferromagnetic surfaces.
Programming/RF Testing/Mounting

The following provides summarized steps for device programming, testing and mounting. For complete details, refer to the control panel installation manual.

1. Loosen bottom screw and separate base from detector.

2. Install 1 Duracell CR123 3v Lithium battery, observing correct polarity.
   *Check that the LED flashes before staying RED

3. Put control panel into programming/configuration mode.

4. Using a programmed alphanumeric keypad, proceed through menus until the display shows ADD A NEW DEVICE.

5. Press YES/OK. The display shows PRESS PROGRAM BUTTON OF DEVICE.

6. Press and release program button on detector. The detector LED flashes. Wait for keypad display to show DETECTOR (1 - 25) RECORDED.

7. Press YES/OK. The display shows RADIO RANGE TEST? Press YES/OK again. The detector LED starts flashing and keypad display shows TEST IN PROGRESS.

8. Take detector to its intended mounting location and make sure LED flashes continuously, indicating good communication with control panel.

9. Press YES/OK to end radio range test, then press Esc/No.

10. The display shows AREA ASSIGNMENT AREA: 1. Press either arrow button repeatedly until desired AREA number appears, then press YES/OK.

11. The display shows PERIMETER DEVICE? Press YES/OK or Esc/No, whichever is appropriate for this device.

   Note: Only contacts protecting the external access should be configured for Perimeter arming.

12. The display shows NAME + LOCATION:
Enter appropriate device name/location (up to 16 characters), then press YES/OK. The display shows the device number and name for your verification.

13. Press YES/OK. The display shows FUNCTIONAL DEVICE TEST? Press YES/OK again and verify detector operation. For example, move magnet next to detector to make LED go out, then move magnet away from detector to make LED turn on indicating detection.

14. Press YES/OK to end detection verification.

15. The display shows ENTERING A NEW DEVICE?
Repeat steps 1 - 14 for remaining detectors.

16. When finished, exit from configuration mode.
> Remove batteries before any maintenance!
> WARNING, there is a risk of explosion if a battery is replaced by an incorrect type!
> Observe polarity when setting up the batteries!
> Do not throw used batteries! Bring them to your installer or a collection point.

---

**FCC Regulatory Information for USA and CANADA**

FCC Part 15.21 Changes or modifications made to this equipment not expressly approved by RSI VideoTechnologies may void the FCC authorization to operate this equipment.

FCC Part 15.105 Class B
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
> Reorient or relocate the receiving antenna.
> Increase the separation between the equipment and receiver.
> Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
> Consult the dealer or an experienced radio/TV technician for help.

Radio frequency radiation exposure information according 2.1091 / 2.1093 / OET bulletin 65
This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance of 20 cm between the radiator and your body.

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

Cet équipement est conforme aux limites d’exposition aux rayonnements IC établies pour un environnement non contrôlé.
Cet équipement doit être installé et utilisé avec un minimum de 20 cm de distance entre la source de rayonnement et votre corps.

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

This device complies with Part 15 of the FCC Rules and with RSS-210 of Industry Canada.
Operation is subject to the following two conditions:
1 This device may not cause harmful interference, and
2 This device must accept any interference received, including interference that may cause undesired operation.

Le présent appareil est conforme aux CNR d’Industrie Canada applicables aux appareils radio exempts de licence.
L’exploitation est autorisée aux deux conditions suivantes:
1 L’appareil ne doit pas produire de brouillage, et
2 L’utilisateur de l’appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d’en compromettre le fonctionnement.
**Properties**

**Panel Compatibility**  
XL, XLL, Visio, XT, XV and their variants

**Power Requirements**

Nominal Voltage  
3.0V

Low battery limit  
2.7V

Battery Type  
Lithium

Quantity  
1

Manufacturer and reference  
Duracell, CR123A

Battery life  
Up to 4 years

**Current Consumption**

Standby  
35 µA

Max  
35 mA

**Magnet Detection**

Detection axis (X1, X2, Y, Z)

- Opening detection distance  
20 / 20 / 29 / 41 (mm)

- Closing detection distance  
4 / 6 / 16 / 24 (mm)

Initialization delay  
10s

Recovery delay  
2s

**RF Technology**

RF  
S²View®

Radio type  
Spread Spectrum Bidirectional RF

Central Frequency:

- 868MHz : IDC200 & (Europe, Africa, Asia)
- 915 MHz FHSS : IDC601 (USA, Canada, South America)
- 920MHz FHSS : IDC701 (Australia, South America)

Transmission Security  
AES algorithm encryption

Supervision  
Polled signal every 8 minutes

Antenna  
Integrated

**Tamper**  
Wall and cover tamper

**Installation / Mounting**

**Detector**

One screw secures cover to base;

Two screws secure detector to mounting surface.

**Magnet**

Two screws secure magnet assembly to mounting surface.

**Physical Data**

Operating temperature  
-10°C to +55°C (14° to 131°F)

Maximum relative humidity  
75%, non-condensing

Material  
Plastic: ABS—ULV0

**Dimensions**

LxWxD  

- Body  
3.7 x 1 x 0.86in (95 x 25.8 x 22mm)

- Spacer  
2.5 x 0.59 x 0.39in (64 x 15 x 10mm)

- Magnet  
2.5 x 0.59 x 0.43in (64 x 15 x 11mm)

Weight: Detector  
38g/1.4oz. – without battery

**Physical Protection**  
IP31 and IK04

**Standards & Certifications**

**868MHz - IDC200 & IDC210**
