Description
The W series control panel is a wireless hybrid alarm system. It is designed for residential and small business security applications.

The W alarm panel protects assets and persons in a defined area, thanks to the installations of RSI radio detectors.

With their LAN or 2G3G transmitters, the events are perfectly transmitted from the W and WIP panels to the security server. The available variants allow for any needed combination: LAN, 2G, 2G+LAN, 3G+LAN.

The WIP210 panel is fitted with two transmitters (2G3G and LAN), allowing perfect reporting to the security server.

This panel is powered by USB 5VDC (5VDC for WIP6xx and WIP 7xx) through an AC adapter/charger. In case of power failure, a rechargeable lithium battery will power the system.

The following customization options allow you to configure the alarm system as needed:

> WLAN 802.11 (WWB100) transmitter option.
> Supervised wired input/outputs option (WIO100) to link the system to wired devices.
> A wired and supervised siren option (WIS100) connected to the W panel also allowing the use of additional Videofied wireless sirens (indoor and outdoor).

A programming keypad is mandatory to install, set up and use the W alarm panel.

Security
With the two modes of transmission, LAN/WLAN and GSM, the W series panel ensures maximum safety. In case of LAN/WLAN connection loss, the W panel will switch immediately to GSM to transmit alarms and videos.

Supervised Wireless Technology
The W series, along with all Videofied devices uses patented S2View® - Spread Spectrum, Videofied, Interactive, AES Encrypted Wireless technology, providing optimum signal integrity and security.

Bi-directional RF communication between all system devices and the system control panel assure high signal reliability.

Integrated antennas eliminate protruding wires or rods cumbersome to install and unsightly to consumers, and if damaged could lead to potential system communication problems.

The panel supervises every device (excluding the remote keyfob) to monitor current open/close state, tamper condition, serial number, date of manufacture, firmware revision, and battery status.
Certifications

868MHz (WIP 210/220/230 and W 210)

Compliant with the annex IV from the R&TTE 1999/5/CE Directive

NF&A2P - 2 boucliers – suivant le référentiel NF324-HS8

Matériels de sécurité électroniques, détection d’intrusion
CENTRALE D’ALARME + TRANSMETTEUR

This symbol on the product or on its packaging indicates that this product should not be treated as household waste. It must be handed over to the applicable collection point for the recycling of electrical and electronic equipment. By ensuring this product is disposed of correctly, you will help prevent potential negative consequences for the environment and human health. The recycling of materials will help to conserve natural resources. For more information about recycling of this product, please contact your local municipality, your waste disposal service or the company that installed the product.
Notes de sécurité / (EN) Security notes / (DE) Hinweise zur Sicherheit

Français
• Retirez la batterie avant toute opération de maintenance !
• Attention ! Il y a un risque d’explosion si la batterie utilisée est remplacée par un mauvais modèle !
• Respectez la polarité lors de la mise en place de la batterie !
• Ne jetez pas la batterie usagée ! Ramenez-la à votre installateur ou à un point de collecte spécialisé.

English
• Remove the battery before any maintenance !
• WARNING, there is a risk of explosion if a battery is replaced by an improper model !
• Observe polarity when setting up the battery!
• Do not throw the battery when it is used! Dispose of it properly according to Lithium Metal requirements

Deutsch
• Batterien vor jeglichen Wartungsarbeiten entfernen!
• Vorsicht, es besteht Explosionsgefahr, wenn eine Batterie durch eine Batterie falschen Models ersetzt wird!
• Achten Sie beim Einsetzen der Batterie auf die Polung!
• Entsorgen Sie Batterie nicht im normalen Haushaltsmüll! Bringen Sie Ihre verbrauchten Batterie zu den öffentlichen Sammelstellen.

FCC Regulatory Information for USA and CANADA

FCC Part 15.21 Changes or modifications made to this equipment not expressly approved by RSI Video Technologies may void the FCC authorization to operate this equipment.

FCC Part 15.105 Class B
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
> Reorient or relocate the receiving antenna.
> Increase the separation between the equipment and receiver.
> Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
> Consult the dealer or an experienced radio/TV technician for help.

Radio frequency radiation exposure information according 2.1091 / 2.1093 / OET bulletin 65
This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance of 20 cm between the radiator and your body.
This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

This device complies with Part 15 of the FCC Rules and with RSS-210 of Industry Canada.
Operation is subject to the following two conditions:
1 This device may not cause harmful interference, and
2 This device must accept any interference received, including interference that may cause undesired operation.

Cet appareil est conforme à la Partie 15 des réglementations de la FCC et avec la norme RSS-210 de l’Industrie Canadienne.
Son fonctionnement est soumis aux deux conditions suivantes :
1 Cet appareil ne doit pas causer d’interférences nuisibles et
2 Cet appareil doit accepter toute interférence reçue, y compris les interférences pouvant entraîner un fonctionnement indésirable.
**Electrical data**

**Power Supply**
- W210 / WIP 210 / WIP 220 / WIP 230
  - 5Vdc/1A Mini-USB connector
- AC/DC adapter (110/230Vac/50-60 Hz) available (WPS100)
- WIP 620 / WIP 630 / WIP 720 / WIP730
  - 12Vdc/1A - Wire connection

**Backup battery**
- Battery technology: Rechargeable 3.7V Lithium-ion battery
- Battery voltage (Fully charged): 4.1 V
- Low battery level: 3.95 V
- Guaranteed autonomy when the low battery level is reached: 36h
- Average current consumption in standby mode: 600 µA
- Max consumption: 1 A

**RF S2View® technology**
- Radio type: Bidirectional RF
- Operating frequency:
  - 868MHz - WIP210/220/230 - W210 (Europe, South Africa, Asia)
  - 915MHz - FHSS - WIP620/630 (USA, Canada, South America)
  - 920MHz - FHSS - WIP720/730 (Australia, South America)
- Transmission security: AES encryption algorithm
- Radio jam detection: Yes
- Supervision: Yes
- Antenna: Integrated

**Tamper Detection**
- Tamper: Wall and cover tamper detection

**Box**

**Physical and Environmental Data**
- Operating temperature: -10°/+55°C
- Maximum relative humidity: 75%, non-condensing
- Material: ABS—ULV0
- International Protection Marking: IP31 / IK06

**Dimensions**
- Panel: 143 mm x 200 mm x 44mm (LxWxD)

**Installation/Mounting**
- Control Panel/Base: Two screws secure control panel cover to base; Three screws secure control panel base to the wall

**Transmission**

**Communicator**
- Communicator type:
  - 2G & LAN Ethernet (WIP210)
  - 2G (W210)
  - LAN Ethernet (WIP220 / WIP620 / WIP720)
  - 3G & LAN Ethernet (WIP230 / WIP630 / WIP730)
- Security protocol: Frontel
- IP Stack: TCP/IP
- Video transmission: By Frontel protocol to central monitoring station or App servers
- 2G3G Antenna: Integrated

**Optional modules**
- Wi-Fi: WWB100 (WLAN 802.11 b/g/n)
- Wired Input/Outputs: WIO100 (out of NF&A2P compliance)
- Wired Siren: WIS100

**Video**
- Video format: WMV or MPEG
- Images per second: 5
- Image size: 320x240 or 640x480 pixels
- Video length: 4 to 12 seconds

**Miscellaneous**
- Programming: Keypad or USB
- Max number of devices: 24
- Max number of codes/badges: 50
- Arming modes: 4
- Areas: 4
- Event log: 4,000 events stored on flash memory
