

With VIDEOFIED® , **protect your home...BEFORE the burglar gets in!**

OMVC, OUTDOOR MOTIONVIEWER FOR THE RESIDENTIAL MARKET

New

WIRELESS VIDEO SECURITY

- The most advanced security system with colour video verification
- System for residential outdoor protection - IP65
- Bi-directional radio range in 868MHz European operating frequency
- 4-years battery life

Detect BEFORE the intrusion!

The OMVC - Outdoor MotionViewer is a **wireless** outdoor camera, working on batteries, activated by **movement detection** and with an integrated **curtain lens**.

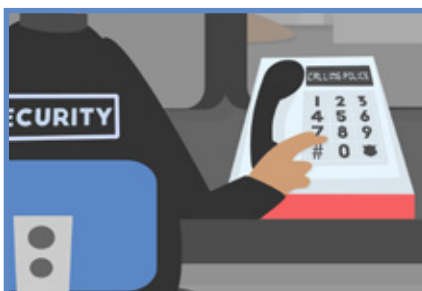

This lens enables the protection of the immediate access points to the home, BEFORE the burglar gets in!

The OMVC also has 4 infrared leds for an optimized night-vision and a front and back tamper managed with an accelerometer.

VIDEOFIED, A 100% DETERRENT SYSTEM!

Don't wait for burglars to break your doors and windows: the Videofied system **protects** and **deters BEFORE the break-in occurs!**

If intruders attempt to enter your property via your yard, terrace or garden, Videofied cameras will detect their presence, film them and notify your **monitoring station** of the danger and the reality of the intrusion.

Sirens and outdoor sirens with flashing lights are other deterrence features of the alarm system. By creating a surprise effect, the triggering of the sirens will deter the intruders and alert your neighbours. The siren's powerful flashing light makes it easy to locate the source of the alarm.

In case of intrusion or real danger, **law enforcement can be quickly dispatched.**

A «CURTAIN» MOTIONVIEWER FOR EFFICIENT PERIMETER PROTECTION!

The outdoor Videofied system can alert one or more of:

- The **monitoring station** by sending a video of the intrusion in real time.
- The **police** who are notified as soon as the monitoring station verifies the video.
- The **home owners** who are sent the alarm and video via push notification to their phones.
- **Neighbours** via the outdoor siren and flashing light.

All of this happens BEFORE the break-in occurs! With the OMVC, you effectively protect your property and provide a deterrent BEFORE the burglary occurs!

A complete range of products

A lot of accessories are compatible with all Videofied panels : keyfob, keypads with or without integrated badge reader, badge readers, sirens, smoke detectors, door contacts ... so many devices which make Videofied products a complete range!
