

NAM system, a.s.

Czech company = 26 years of monitoring technology development

We are a respected producer and supplier of customized hardware and software monitoring technologies solutions. We employ more than 80 employees. We have been on the market since 1990 and focus on security applications. We offer technologies and services designed for surveillance and monitoring of stationary and mobile objects. Under the NAM technology brand, we offer technologies for monitoring centres. These are customized solutions such as 1Box® ARC and REGGAE communication devices for data transfer in various applications. Under the ONI system brand, we develop and produce systems for monitoring and surveillance of vehicles and mobile objects.

WE ARE

We are built on technical and technological know-how. We enjoy discovering new possibilities in the field of monitoring technologies.

WE CREATE

We are driven by our desire to always create the most suitable solution for every customer. We understand the technologies we work with and we know how to implement them in the best possible way.

RELY ON US

We know what is important in the field of security and related devices and services. We provide 24/7 support and monitoring of provided technologies.
